

TERRA NOVA UNIVERSITY
BORDERLESS KNOWLEDGE

Get a
Doctor of Philosophy (Ph.D)
by Research via distance learning

The world of research and professions is constantly evolving. The most qualified profiles must be able to be recognized for their real value and actual competence. Terra Nova University's study programs via distance learning provide access to many specializations, from which students can choose their research topic and propose an original Doctor of Philosophy thesis.

To obtain a PhD, the student has to develop a research thesis in a specific humanities or science discipline, demonstrating mastery and competence in the chosen field of study. The PhD is the highest academic level in the Anglo-Saxon and US systems.

In order to be eligible for the program, students need to possess a Master's degree or equivalent and be at least 30 years old.

A PhD program via distance learning, being independent and autonomous through the innovative approach involved, is an extraordinarily effective way to add value to one's humanities, technical or scientific background. Indeed, there is no doubt that successfully carrying out a distance program involves, in addition to a great creative personality, a specific commitment to achieve goals and pave the way for further specialization.

Unlike any other traditional campus-based programs, Terra Nova University's PhD by Research does not consist of any coursework, classes or lectures to attend, either on campus or online. Rather, it is based on independent and autonomous theoretical research on a specific academic area that the student has to carry out and implement in a final thesis.

Specific PhD degrees like Doctor of Science (DS), Medical Doctor (MD), Juris Doctor (JD) are primarily grounded on laboratory research and empirical investigation. These doctorates are successfully achieved after several years of laboratory experience or professional practice among other requirements. Therefore, they are not available at Terra Nova University, since it should be quite clear that any laboratory method or professional practice cannot occur online or through any distance learning system.

The program has no minimum duration, whereas a maximum duration of 24 months. It does not have any intake or admission deadline; therefore, students can apply any time of the year. **The main requirement for a distance learning PhD by Research is to submit and defend the final thesis, which is required to have a minimum length of at least 90/100 pages.** After the submission, it will be reviewed and evaluated by Terra Nova University's academic committee. In some cases, previous candidate's publications may be relevant for PhD purposes.

How to apply for the PhD by Research

To apply for the program, please send the application form, duly filled in and signed, together with your detailed CV, a copy of your passport or ID card and a passport size photo to our email address: **info@terranova.university**

In case the application is accepted, our Secretariat will send via email the Acceptance Letter, the Enrollment Certificate and the Payment Plan of your choice.

TOTAL COST OF THE PHD PROGRAM: € 2600

Two thousand six hundred euros

The cost of the PhD program is final and all-inclusive: ongoing student support, general thesis supervision and evaluation, issuance and shipment of diploma certificate and transcript, degree authentication via Blockchain technology. **Terra Nova University cannot issue any scholarships, discounts or benefits whatsoever, because it is an international and private distance learning university, which does not have any system of institutions to rely on to issue any economic or financial benefits.**

As we are a distance learning university and our students come from all over the world, the thesis defense has to be submitted by email after the thesis approval.

Students can choose one of the following options to defend their thesis:

1) **Written defense** (to be sent via email):

a 3-5 page paper, in which the student summarizes the main argumentations of the study, showing how the research objectives were achieved.

2) **Oral defense** (to be sent via email):

a 15'-20' audio or video presentation, in which the student discusses the main aspects of the study, from the premises to the findings of the research.

**Terra Nova
University's PhD
by research does not consist
of any coursework,
classes or lectures to attend,
either on campus or online**
